IQ

INSIDE

IQ-INSIDE

IQ-INSIDE by Ristal Laminates is a premium decorative surface collection, thoughtfully crafted for modern furniture interior applications.

Designed especially for architects and interior designers, IQ-INSIDE combines superior quality, refined aesthetics, and dependable performance to create elegant, functional interior spaces. Its smooth finish enhances the beauty and durability of wardrobes, cabinets, shelves, drawers, and other interior furniture components.

Lightweight, versatile, and engineered for long-lasting performance, IQ-INSIDE is the ideal choice for premium furniture interiors where design excellence meets everyday durability.

CERTIFICATES

Certified for Quality, Trusted for Performance.

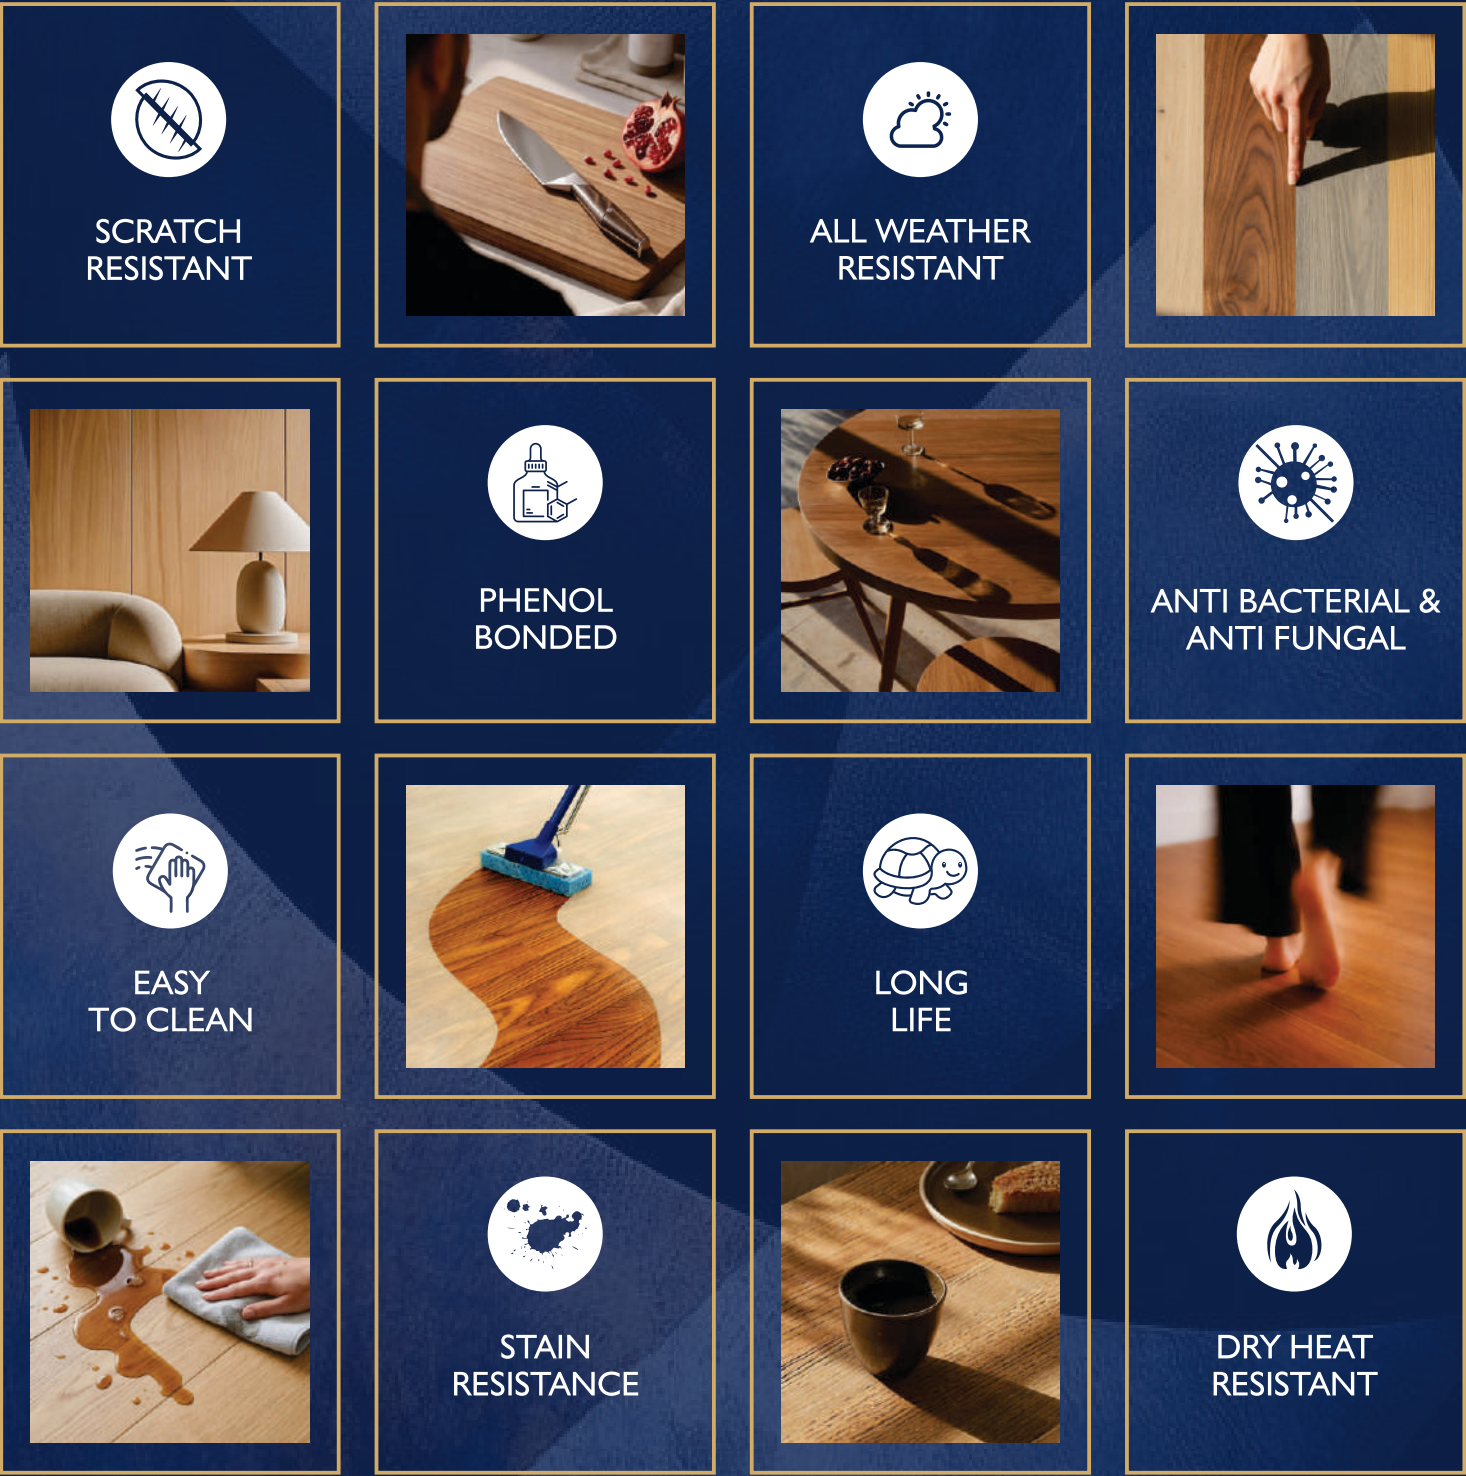

Every surface we create meets rigorous standards of quality, safety, and durability because excellence should never be assumed, it should be certified.

Our commitment to compliance reflects our commitment to you.

Backed by recognised certifications across manufacturing and environmental benchmarks, we ensure consistency in every batch, every finish, every application.

Because trust isn't just promised it's proven, standard after standard.

TECHNICAL SPECIFICATION

RISTAL Modern Laminates

Ristal Modern is strongly recommended for all inside or backside applications of wall panels, storage cabinets & doors, shelves, counters, tables, cupboards, beds, racks, etc. due to its various advantages.

Product Characteristics

The Modern Laminates protect the furniture from humidity and is the right balancing material. The liner bonds well with all substrates due to its sanding property.

Storage

Please store the sheets horizontally with a thick board at top and bottom to avoid any damage. Vertical storing is not recommended for Modern Laminates. Protect it from water & moisture and never store directly on the floor or touching the wall.

Maintenance

The Ristal Modern does not need any maintenance. It is easy to clean, just wipe with a damp cloth.

Note:

Please do not use plywood with high moisture content, uneven surface and inferior quality as it will lead to air bubbles between the plywood and laminates. Insufficient quantity or inferior quality of adhesive will also lead to delamination or air bubbles. The Company will not entertain any complaint in this regard.
